SKILLS

Coding	Python (Expert), C/C++, Java, JS, SQL
LLM & AI	RAG, Agents, MCP, Claude API, Vector DB
ML / DL	PyTorch, TF, Scikit-learn, HF Transformers
MLOps	Docker, CI/CD, Git, Linux, Cloud
Data	Pandas, NumPy, Embeddings, BM25, Reranking
Web	Flask, Node.js, Next.js
Domains	NLP, Vision, RL, Distributed Systems

STRENGTHS

Autonomy · Scientific rigor · Problem-solving · Teamwork

LANGUAGES

English	C2 – Proficient
French	Bilingual
Arabic	Native

CERTIFICATIONS & AWARDS

- ★ LanguageCert C2 – English, Ofqual-regulated (02/2026)
- ★ AYLП – Leadership & Tech, Nevada (USA)
- ★ Deep Learning Cert. – PyTorch
- ★ Avignon AI Hackathon 2025 – Tech Lead

ACTIVITIES

- ▷ Google DSC – IT Lead
- ▷ Mentoring & tech workshops
- ▷ Tennis · Painting

ZINEB MEFTAH

AI ENGINEER · MLOPS · DEEP LEARNING

Autonomous AI systems in production · Permanent, fixed-term or apprenticeship
Available from Sept. 2026 · Île-de-France or fully remote

🌐 Portfolio: zinebmeftah.github.io

PROFILE

Ranked 1st of 126 in L2 & L3 at the University of Avignon (> 15/20), trained at ENSIA’s elite AI preparatory program (Algiers, taught in English). I combine genuine engineering rigor — code, backend, complex systems — with strong AI expertise to build autonomous systems deployed in production. Fresh from an AI & MLOps Engineering internship at GE HealthCare Paris, I am now pursuing a Master 1 MLSD (Machine Learning for Data Science) at Université Paris Cité.

EDUCATION

Université Paris Cité 2026 – Present
M.Sc. Year 1 – MLSD, Machine Learning for Data Science

- Leading French AI / data science program, available as a work-study track
- Coursework: Advanced Machine Learning, Deep Learning, Big Data, Statistics

University of Avignon – CERI 2024 – 2026
B.Sc. Computer Science, Artificial Intelligence Track

- Top of class L2 & L3 – S3 14.88 · S4 16.38 · S5 14.54 · S6 14.94
- Coursework: Machine Learning, NLP, Artificial Intelligence, Advanced Algorithms, Graph Theory

ENSIA – Higher National School of AI, Algiers 2022 – 2024
Engineering Preparatory Cycle – 120 ECTS (fully taught in English)

- Highly selective national elite school · High Honors (Mention Très Bien)
- Coursework: Linear Algebra, Optimization, Probability, Algorithms, Information Theory

PROFESSIONAL EXPERIENCE

GE HealthCare – Paris May – Jul. 2026
AI & MLOps Engineering Intern

- Production RAG agent: natural-language querying of complex technical documentation, every answer traced to the exact source section, turning hours of manual lookup into seconds
- Pipeline coded end to end as modular skills, then re-architected into a multi-agent system on Microsoft Copilot Studio once the linear pipeline’s token cost became the bottleneck — custom preprocessing kept upstream

SELECTED PROJECTS

AI Outreach Agent – Autonomous System in Production 2026 – Present

- Autonomous AI pipeline in production: LLM opportunity qualification, personalized emails, SMTP/IMAP, reply classification · 7 skills on cron · Python · Claude API · Playwright · Google Cloud VM → [GitHub](#)

Autonomous Content Engine – Multi-Platform, in Production 2026 – Present

- Closed-loop system publishing across YouTube, TikTok, Instagram & Facebook: email-driven control, views/likes scraping, automatic weekly republishing of top performers · Amazon affiliate links · n8n · AWS EC2 · LLM

LeRobot – Robotics Learning & MLOps Jan. – Mar. 2025

- End-to-end MLOps pipeline for training autonomous robotic agents via Diffusion Models (ACT) · Python · PyTorch · Hugging Face → [Model](#) · [Training UI](#)

RESEARCH

“Tags Generation Dataset” – Hugging Face Blog Aug. – Dec. 2024
